

## A guide to using the NHS App

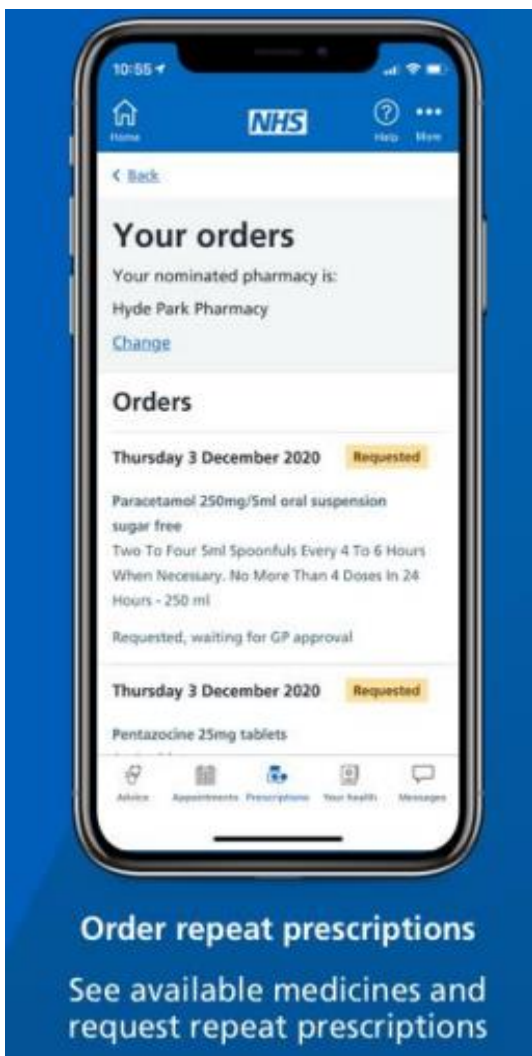

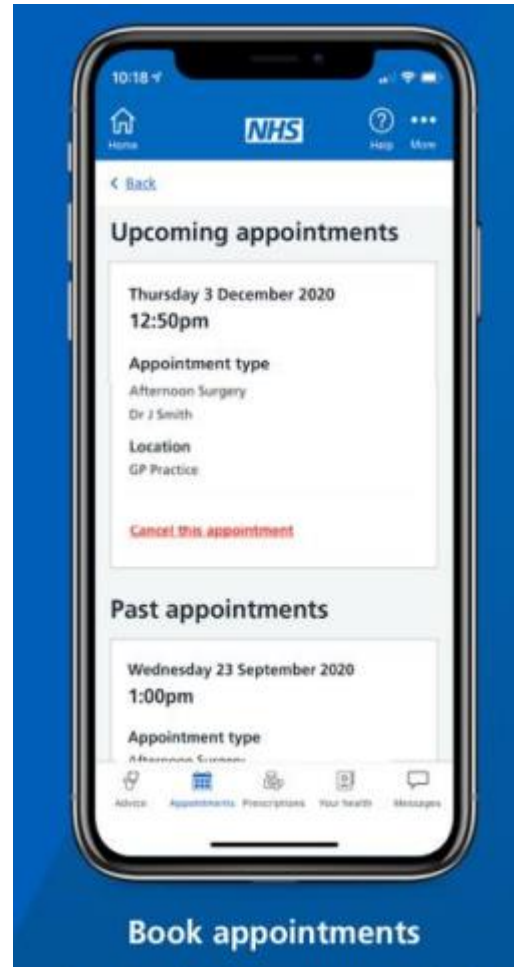

### Appointments

To book or view appointments at your GP surgery, Hospital or other appointments, choose the 'Appointments' button along the bottom of the screen.

We currently only offer smear appointment booking through the app, you can see a list of any upcoming or past appointments with us via the app still. For any medical requests you can contact the practice via patches online or via our phone line 01225 896630.

You can also cancel upcoming appointments via this screen if you are no longer able to attend.

Depending on what hospital appointments you have it may be possible to view this via the NHS App

### Prescriptions

On the prescription tab you are able to view the following:

- Order a repeat prescription and choose a pharmacy that is most convenient for you to collect your prescriptions from
- View previous prescriptions

You will also be able to amend your nominated pharmacy too.

This will vary depending on what access you have to online services that been given

## Your Health

On your health tab you are able to access your medical record, there is also advice and information on the following:

- Access your NHS COVID Pass
- View your COVID-19 vaccine record
- Access your GP health record
- Manage your organ donation
- Choose if data from your health records can be shared for research and planning

The level of detail in your GP health record will depend on the access that has been given at the surgery, if you would like full access then please speak to reception who will give you a form to fill in.
